

Executive Summary & Business Recommendations

Executive Summary

- Employee learning culture is healthy and broadly distributed across departments.
- Training programs exhibit stable completion behaviour with limited departmental variation.
- Advanced Excel & Reporting and Data Analytics Fundamentals demonstrate the strongest business impact.
- Senior employees account for a significant share of organizational learning participation.

Strategic Recommendations

1. Introduce structured learning pathways for freshers during the first year of employment.
2. Expand high-impact programs such as Advanced Excel, Data Analytics, and leadership-oriented training.
3. Implement targeted interventions for departments with relatively higher dropout rates.
4. Improve master data governance to minimize incomplete department classifications.
5. Adopt effectiveness-based reporting metrics that combine completion outcomes with performance improvement.

Analytical Approach Demonstrated

- Data quality auditing and business-rule-driven cleaning.
- Feature engineering using experience, learning load, and performance indicators.
- Matplotlib and Seaborn storytelling visualizations.
- Business interpretation focused on decision support rather than dashboard development.
